AUTISM
RESOURCE GUIDE

Dear Arkansas Autism Community,

Research supports early and intensive intervention using evidenced-based strategies for people with autism spectrum disorders. Access to these services is vital to improving life outcomes for persons who have autism spectrum disorders and their families. Therefore, it is imperative that parents and guardians are able to find professionals to serve their children. However, many times parents and guardians are overwhelmed with navigating the autism service system.

The need for access to autism services is the reason Project Connect has introduced its first Arkansas Autism Resource Guide. This collection of resources from across the state is an effort to identify needs and provide families with autism resources in their region.

The resources we have gathered and identified are in accordance with the National Professional Development Center on Autism Spectrum Disorders and the National Autism Center's evidence-based practices guides for families and professionals. Project Connect encourages professionals and families to use these resources to guide interventions for their children, or the children they serve.

The purpose of the guide is to provide professionals and families with a starting point. Agencies serving the autism community can be listed in the resource guide free of charge. Please note that Project Connect does not endorse or provide references for these agencies. All information provided is voluntarily submitted by the agencies. We encourage families of individuals with autism spectrum disorders to seek out evidenced-based strategies, to check references for service providers, and to use providers who make data-based treatment decisions.

On behalf of Project Connect, thank you for allowing us to serve the autism community.

Peggy J. Schaefer Whitby
Project Connect
Associate Professor
University of Arkansas Fayetteville

**Register today for the Arkansas Autism Resource & Outreach Center
Family Training Series in Fayetteville, Arkansas**

This series of three (3) workshops is FREE to parents of children diagnosed with autism spectrum disorders (ASD) and to their extended family. The workshops will be held on January 16th, February 20th, and March 12th of 2016, and by registering you are signing up for ALL THREE (3) of the following workshops:

January 16th, 2016 - Session 1: Understanding ASDs

So much about autism is puzzling. Many of the behaviors exhibited by individuals with autism spectrum disorders can be troubling, but understanding possible reasons why individuals exhibit such behaviors is key to addressing them. This workshop explains how individuals with ASDs process information in their environment, and gives examples of strategies that can be used to support these individuals in their everyday lives.

February 20th, 2016 - Session 2: Navigating Services in Arkansas

Individuals with autism are served in Arkansas by a number of different state agencies. So many, in fact, that families often report that they missed an opportunity to receive a service or benefit because they weren't aware such a program existed. Additionally, recent changes to insurance regulations mean that families have access to evidence-based treatments that were once out of reach. In this session we discuss which agencies are responsible for serving individuals with autism, what kinds of services they may provide, and regulations governing private insurance benefits.

March 12th, 2016 - Session 3: Understanding the Special Education Process & IEP

The Individuals with Disabilities Education Improvement Act (IDEA) ensures that children with disabilities receive a free appropriate public education (FAPE) in the least restrictive environment (LEA). However, the process of developing an individualized education plan (IEP) can be a confusing (and at times, intimidating) experience for families. This session focuses on the IEP process, from identification and referral for special education services to implementation of the plan.

**Lunch will be provided to workshop attendees*

Register or get more information at

Expands....

The Arkansas Autism Resource & Outreach Center (AAROC) was established January 2008 as a non-profit 501(c)3 organization. The mission of the AAROC is to provide Hope, Direction & Support to families of individuals diagnosed with an autism spectrum disorder.

The AAROC mission is fulfilled through the following activities:

PARENTAL SUPPORT:

- Family Fun Days to defer the cost for families to enjoy a day at the Little Rock Zoo or an Arkansas Traveler's Game.
- Information and Referral Services to assist families with identifying available services, eligibility criteria, and necessary paperwork
- Emotional Support by connecting families to other families in their community who have similar experiences and by providing caring staff who are available to talk through issues, or simply listen, when they need it
- Technical Assistance by answering questions on a variety of topics including school issues, IEPs, Medicaid services, postsecondary options, behavioral challenges, etc.

EDUCATION AND TRAINING:

- Seminars and conferences for parents, therapists, educators, health care professionals, and first responders
- A four-part series offered quarterly for parents whose children have been newly diagnosed

AWARENESS AND ADVOCACY:

- Various fundraising and awareness activities
- Legislative Advocacy
- Participation on the Legislative Task Force on Autism

The AAROC's corporate headquarters are located in the offices of Partners for Inclusive Communities at 322 Main Street, Suite 501, Little Rock, Arkansas, 72201. Dianna Varady, the AAROC Director and parent of a child with ASD, and an Administrative Staff person will be located in the Little Rock office. Dianna is available at 501-454-8542 or through email at ddvarady@uark.edu.

Effective September 1, 2015, the AAROC is initiating the first phase of expansion for state-wide coverage by adding satellite locations in NW Arkansas and Eastern Arkansas to address the needs of additional families across the state.

A part-time employee at the University of Arkansas/College of Education and Health Professions, Laura Reynolds, has been hired to serve as the AAROC Contact for Northwest Arkansas. **Laura is the parent of a child with ASD and has worked with Project Connect providing resource and referral services for families. Laura can be reached at projconn@uark.edu or by calling 479-575-3215.**

The AAROC is partnering with Dr. Becky G. Hall, Director, at the UAMS Delta Area Health Education Center (AHEC) Helena-West Helena, AR to identify needs and potential resources for that location of the state.

The AAROC is excited about the potential for reaching families in these locations and anticipated further expansion in the coming years. For additional information, go to www.aaroc.org

In order to make the best decisions for your child, you need to be an educated consumer of services. However, the seeking out of services for children with ASD can be overwhelming. Here we provide a list of questions that families can ask when seeking services. General Questions:

1. Is the agency and/or staff licensed or accredited?
2. How much experience does your staff have working with people with developmental disabilities?
3. What type of professional development is provided for your staff?
4. How much training and experience does your program director have?
5. How much staff turn-over do you have?
6. What is the staff-to-client ratio? Does this meet the established guide lines for this type of program?
7. Can I observe a therapy session?
8. Do you have references I can check?
9. How will you assess my child?

ABA Specific Questions:

1. Do you offer ABA based therapy?
2. What specific activities can be done at home to support my child's progress?
3. What happens during a typical treatment session?
4. How involved are parents and primary caregivers in the day-to-day delivery of my child's program?
5. Do you provide weekly/monthly reports on my child's progress? If so, what method will they use to keep parents in the loop regarding my child's therapy?
6. Do you provide training and support for families?
7. What type of data do you collect and how often do you collect data?
8. Do you have a BCBA on staff?
9. What is the BCBA's experience? (i.e. years of therapy, age groups.)
10. How much supervision will the BCBA provide each week for my child's therapy?

Billing Questions:

1. Do they accept insurance or Medicaid?
2. Is my insurance in network?
3. What if I cannot pay the amount I owe in full?
4. What if my insurance company does not authorize or cover services?
5. What if there was a mistake on my statement?
6. What if my insurance coverage changes?
7. How often will I receive a statement?
8. Who do I call if I have questions?

WHAT IS AUTISM SPECTRUM DISORDER?

Autism Spectrum Disorder (ASD) is a range of developmental disabilities that cause impairments in multiple areas of development and typically appear within the first 3 years of life. ASD is a complex neurological disorder that affects brain function. The core areas of impairment include ***Social Interaction Communication and Behavior.***

Changes have been made to the DSM-5. The criteria for diagnosing now merges previously independent diagnoses of Autistic Disorder, Asperger's Disorder, and Pervasive Developmental Disorder–Not Otherwise Specified, into a single subtype, Autism Spectrum Disorder.

An individual's severity along the autism spectrum is now described according to the amount of required support and documents other issues commonly seen within the autism population. Sensory processing is now accessed within the behavior domain.

Currently, 1 in 65 children will be diagnosed with ASD in Arkansas (CDC, 2014). Currently prevalence studies suggest 1 out of 42 boys and 1 out of 189 girls will be diagnosed with an ASD.

Examples of Impairment	
<i>Social Communication</i>	<i>Restrictive, Repetitive Behavior</i>
<ul style="list-style-type: none">• Lack of social- emotional reciprocity• Difficulties using or understanding nonverbal cues such as gestures, facial expressions, body language• Difficulties developing, maintaining, and understanding relationships• Lack of Joint Attention• Lack of or limitations in verbal communication	<ul style="list-style-type: none">• Repetitive or stereotyped movements and/or speech• Preoccupation with interest that is abnormally intense or focused• Inflexible adherence to routine• Hyper- or Hypo-reactivity to sensory input, or unusual interests in sensory aspects of environment

ABOUT US

DR. PEGGY J. SCHAEFER WHITBY Whitby is an associate professor and coordinator of the special education programs at the University of Arkansas. Prior to coming to Fayetteville, Dr. Whitby was an assistant professor at the University of Nevada Las Vegas and the director of the Center for Autism Spectrum Disorders. She is a board certified behavior analyst at the doctoral level.

Dr. Whitby is the CDC's Learn the Signs. Act Early Ambassador to the state of Arkansas, serves as the co-chair of the state Learn the Signs. Act Early state team, and is the PI for Project Connect, a HRSA Combating Autism State Planning Grant.

Her research interests include the education of children with autism spectrum disorders. She has multiple publications in peer reviewed journals and book chapters on educating children with autism. Dr. Whitby is passionate about educational services for children with autism, as she believes this population has so much to offer yet is at great risk for not reaching their full potential unless proper educational supports are provided.

HOLLIE LAWLESS is the Autism Program Specialist and Program Coordinator for Project Connect at the University of Arkansas in Fayetteville. She received her Bachelor's Degree in Early Childhood Elementary Education from Arkansas State University in 1999 and her Master's Degree in Special Education in May 2015. She will complete her Certificate in Applied Behavior Analysis at the University of Arkansas in autumn 2015.

Hollie's accomplishments include collaborating in the design and development of the Arkansas Autism Resource guide, organizing and directing Camp Connect in 2014 and 2015, and organizing and facilitating the Autism Symposium at the University of Arkansas in 2014 and 2015. She is active in the community and a member of Association for Behavioral Analysis International, in addition to maintaining her certification as a licensed K-6 teacher.

Hollie was a renowned classroom teacher for twelve years before following her passion to help families affected by autism by returning to school for her Master's Degree. In addition to teaching, she has a year of clinical experience and two years of in-home therapy experience as a line and lead therapist. She currently resides in Springdale, AR with her husband and two beautiful daughters. She can be contacted at projconn@uark.edu.

LAURA A. REYNOLDS, RN currently serves as the Parent Liaison for Project Connect. In addition to her work for Project Connect, Laura is mother to three children, including a beautiful boy who has autism. She knows first hand the challenging complexities and arduous work involved in negotiating the autism

journey, and she is dedicated to helping families navigate their journeys and obtain the necessary services along the way.

Originally from St. Louis, Missouri, Laura received her registered nursing degree from Missouri Baptist School of Nursing. She was an orthopedic nurse at Missouri Baptist Hospital for four years. In addition, she worked for Health South Surgery Center, where she was a pre-op and recovery nurse for three years. After relocating to northwest Arkansas in 2005 with her family, Laura dedicated herself to her family as both a full-time mother and novice therapist to her son.

Laura currently resides in Bentonville with her husband, Dan, and their three children. She can be reached at projconn@uark.edu.

HALEY MCCARVER is the Administrative Assistant for Project Connect. Haley is originally from Springdale, Arkansas where she attended Har-Ber High School. She is currently in her junior year at the University of Arkansas where she is studying pre-med and Kinesiology. She is also a member of the University of Arkansas Honors College. After graduating, Haley hopes to attend Medical School at University of Arkansas for Medical Sciences to become a surgeon. Haley plans to eventually open her own practice one day. She resides in Fayetteville and can be reached at projconn@uark.edu.

Mission Statement

The mission of the Project Connect is to

- (1) Identify the needs of families of children with ASD across the state
- (2) Provide input to systems on the development of ASD support infrastructure
- (3) Provide support to families who have children with ASD
- (4) Connect families of children with ASD to support systems across the state

This resource guide is designed as a resource to help parents identify and select services for their children with an autism spectrum disorder. The resource guide is divided into five different regions of the state and lists services in categories. The guide provides an overview of the findings from the NPDC for Autism's 2014 Report as a starting point for making informed treatment choices based upon scientific evidence. We advise all families to choose evidence-based services for their children.

Project Connect does not recommend, endorse, guarantee, or promote the service providers included in this guide. Any service provider indicating they use evidence-based practices can be listed in the guide free of charge. The sole purpose of the resource guide is to provide information to parents and guardians in need of services.

Although we made a concerted effort to identify local resources, we recognize that this list is not exhaustive. If you would like to be listed in future editions of this resource guide, contact us at (479) 575-3215 and projconn@uark.edu.

ARKANSAS AUTISM PARTNERSHIP (AAP)

The Arkansas Autism Partnership (AAP) is the Autism Waiver program for the state of Arkansas. It provides one-on-one, intensive home-based intervention for young children with ASD. To qualify for services, children must be between 18 months and 8 years of age (must enter the program before their 5th birthday) and receive a diagnosis of ASD from three separate providers: a psychologist, a speech-language pathologist, and a physician. Participation in the program is limited to 25 hours per week for 3 years. There is no cost to the family if they meet Medicaid eligibility requirements. The program can serve only 100 children at this point in time and currently has a small waiting list. An expansion of the program was approved by the Arkansas General Assembly in 2015 that should result in the addition of 50 children subsequent to federal approval. The program differs from the Alternative Community Services waiver in that it focuses exclusively on evidence-based practices for young children with ASD. It delivers services in the child's home and requires that parents be present and participate in the intervention. Specific services offered through the AAP include:

- Individual assessment/treatment development
- Provision of therapeutic aides and behavioral reinforcers
- Lead therapy intervention
- Line therapy intervention
- Consultative clinical and therapeutic services

For questions or to receive an application/instructions for submission, email Karan Burnette at kbburnet@uark.edu

ARKANSAS AUTISM INSURANCE MANDATE

HB 1315 was enacted March 4, 2011 and became effective October 1, 2011 requiring certain private health insurance plans to cover autism services. State Employee Health Plans and fully insured group plans are covered by this mandate and required to provide autism services. Individual plans and those regulated by federal law (ERISA plans) such as self-insured groups, are not subject to the mandate. Services covered by the mandate include:

- Diagnosis
- Applied Behavior Analysis (limited to \$50,000 annual cap for individuals under 18 years of age)
- Pharmacy care
- Psychiatric care
- Psychological care
- Therapeutic care (Speech, Occupational and Physical Therapies)
- Equipment necessary for evidence-based treatment
- Any medically necessary and evidence-based care determined necessary by a licensed physician

Insurance carriers determine reimbursement rates for providers of service and co-pays charged for claims.

For questions or additional information, email Dianna Varady at ddvarady@uark.edu

^{1,3} Individual insurance plans purchased on or after January 1st, 2014 must provide coverage mandated by Act 196 thanks to a provision of the Affordable Care Act. Individual plans may not impose a dollar limit on services, but may impose a limit on the number of visits that is comparable to the annual dollar cap for ABA

² To find out whether or not your employer-sponsored health plan is self-insured call your employer's human resources administrator.

2015 ARKANSAS LEGISLATIVE UPDATE

Act 46 Establishes the Health Reform Legislative Task Force, which is comprised of 16 members of the Arkansas General Assembly and is charged with examining how healthcare in Arkansas is funded and delivered and making recommendations for changes to healthcare services including all Medicaid programs. The task force is required to submit a written report with recommendations to the full Arkansas legislature and the Governor on or before December 30, 2016.

Act 410 establishes the Building Better Futures Program, the purpose of which is to “allow students with disabilities to broaden their career opportunities through education and job training in an inclusive and age-appropriate environment” at institutions of higher education that wish to establish a Comprehensive Transition and Postsecondary Program recognized by the United States Department of Education. A companion bill to Act 410, Act 931, allows high school students with intellectual disabilities to participate in Building Better Futures Programs at nearby institutions of higher education as part of his or her individualized education program (IEP).

Act 574 authorizes the Department of Finance and Administration to issue an autism awareness specialty license plate. Proceeds from the plate will go to the Arkansas Autism Resource & Outreach Center (AAROC).

Act 839 establishes the Legislative Task Force on the Best Practices for Special Education. The task force “shall study and research ways to improve special education and how special education can positively impact student education and achievement outcomes.” The task force is required to file a written final report with the Arkansas Legislature and the Governor on or before September 1, 2016.

Act 1178 establishes the Succeed Scholarship Program, which provides scholarships for eligible students with disabilities to attend eligible private schools beginning in the 2016-2017 school year.

Act 1238 creates the Achieving a Better Life Experience (ABLE) Program, which will allow families of individuals with disabilities (when the disability occurred before the individual’s 26th birthday) to open and make contributions to a special savings account (an ABLE account) similar to a 529-college savings account. Money accrued in ABLE accounts will not count against a person’s Medicaid benefits, and accounts with funds in excess of \$100,000 will count against a person’s social security income benefits. Distributions from the account may be used for qualified disability expenses including assistive technology and personal support services, education, employment training and support, expenses for oversight and monitoring, financial management and administrative services, funeral and burial expenses, health and wellness expenses, housing, legal fees, transportation, and other approved expenses.

Act 1268 modifies the requirements of school districts to screen students for dyslexia. The new law requires schools to follow a specific screening process for children in kindergarten through second grade, and requires all educational cooperatives to have on staff at least one specially-trained dyslexia interventionist.

NATIONAL STANDARDS REPORT FROM NATIONAL AUTISM CENTER

The purpose of this report was to enable parents, educators and service providers to make the most informed treatment choices. The National Autism Center has provided a list of established, emerging and un-established treatments for individuals with ASD.

Established Evidence Based Treatments for Individuals with ASD:	
Language Training (Production)	Peer Training Package
Behavioral Interventions	Pivotal Response Training
Comprehensive Behavioral Treatment	Schedules
Cognitive Behavioral Intervention Package	Self-Management
Modeling	Story Based Intervention
Naturalistic Teaching Strategies	Parent Training
Social Skills Package	Scripting
Emerging Treatments for Individuals with ASD:	
Augmentative and Alternative Communication Device	Music Therapy
Developmental Relationship-based Treatment	Picture Exchange Communication System
Exercise	Reductive Package
Exposure Package	Sign Instruction
Imitation-based Interaction	Social Communication Intervention
Initiation Training	Structure Teaching
Language Training (Production and Understanding)	Technology-Based Treatment
Massage/Touch Therapy	Therapy of Mind Training
Multi-component package	Therapy of Mind Training
Un-established Treatments for Individuals with ASD:	
Language Training (Production)	Peer Training Package
Behavioral Interventions	Pivotal Response Training
Comprehensive Behavioral Treatment	Schedules
Cognitive Behavioral Intervention Package	Self-Management
Modeling	Story Based Intervention
Naturalistic Teaching Strategies	Parent Training
Social Skills Package	Scripting

Source: National Autism Center, (2015)

The full guide can be found here: <http://www.nationalautismcenter.org/resources/>

Evidence-based practices identified by the National Professional Development Center (NPDC) on ASD and the National Standards Project (NSP)

Evidence based practices for children and youth with ASD:		
Antecedent-Based Interventions	Prompting	
Cognitive Behavioral Intervention	Reinforcement	
Differential Reinforcement of Alternative, Incompatible, or Other Behavior	Response Interruption/Redirection	
Discrete Trial Training	Scripting	
Exercise	Self-Management	
Extinction	Social Narratives	
Functional Behavior Assessment	Social Skills Training	
Functional Communication Training	Structured Play Group	
Modeling	Task Analysis	
Naturalistic Intervention	Technology-Aided Instruction and Intervention	
Parent-Implemented Intervention	Time Delay	
Peer-Mediated Instruction and Intervention	Video Modeling	
Picture Exchange Communication System (PECS)	Visual Supports	
Pivotal Response Training (PRT)		
Other focused intervention lacking sufficient evidence:		
Aided Language Modeling	Independent Work Systems	Sensory Diet
Auditory Integration Training	Joint Attention-Symbolic Play Instruction	Sensory Integration and Fine Motor Intervention
Behavioral Momentum Intervention	Music Intensity	Sentence-Combining Techniques
Collaborative Coaching	Music Therapy	Test Taking Strategy Instruction
Collaborative Learning Groups	Reciprocal Imitation Training	Theory of Mind Training
Direct Instruction	Removal of Restraints	Touch-Point Instruction
Exposure	Schema-Based Strategy Instruction	Touch Therapy
Handwriting Without Tears	Self-Regulated Strategy Development Writing Intervention

ACCESSING AUTISM SERVICES

The purpose of the accessing services charts are to assist families in navigating the service delivery system in the state of Arkansas. Arkansas has created systems of supports for people with disabilities across the lifespan. However, navigating and accessing services can be overwhelming for families who have just received an autism diagnosis or are new to the state.

These maps present a model for how a family could proceed in navigating access to services. There are multiple steps to getting services for a child. Some steps need to be completed in order while others can be completed simultaneously. These maps create a starting point that will help navigate family members through the process of how and when to obtain services. Feedback from families and professionals was gathered to develop the most efficient process.

These maps define and communicate the sequence of services needed to help support your child. Every family is different and by using the maps you can individualize the process to meet your family's needs. A family reviews the maps, locate their child's current age and can follow the steps indicated. If a family has difficulty making referrals, they can contact Project Connect at (479) 575-3215 and a family liaison will assist them with the process.

Birth to 3 Years

Suspect a Delay

- Call Project Connect: 1-855-617-0013
- For local resources in your region
- Developmental screenings information
- Contact your Primary Care Physician (PCP)
- Contact First Connections: 1-800-643-8258

Obtain Diagnosis

- Contact insurance company, confirm that evaluation is covered
- Contact developmental pediatrician
- Ask Physician for referral to Cobalt (See resource guide for regional Cobalt Centers)
 - Dennis Developmental Center: 501-364-1830
 - Schmieding Developmental Center: 479 750-0125
- Evaluation requires a clinical psychologist, speech language pathologist, and medical doctor (see resource guide for local agencies).

After Developmental Delay is Confirmed

- Begin contacting public and private resources listed below
- Contact a local support group - (see resource guide).
- Have hope and always believe in your child

Accessing Public Services

- Call Arkansas Autism Partnership: 1-800-342-2923
- Call the Division of Developmental Disabilities (DDS): 501-683-0870, ask about case management. You will need a case manager to follow your child through high school.
- Complete application for Medicaid waiver, TEFRA and ARHIPP

Accessing Private Services

- Call your insurance company to determine coverage for speech therapy evaluation and treatment, occupational therapy evaluation and treatment, and applied behavior analysis for autism treatment
- Interview agencies to provide services - (see resource guide)
- If your needs are not being met at anytime, refer back to Project Connect or your case manager with the DDS for assistance.

Age 3-14 Years

Suspected Delay

- Call Project Connect: 1-855-617-0013 or email @projconn@uark.edu
 - For local resources in your region
 - Developmental screenings information
- Contact your Primary Care Physician (PCP)
- Contact school and request special education evaluation in writing

Developmental Delay Confirmed

- Contact a developmental pediatrician
 - Dennis Developmental Center: 501-364-1830
 - Schmieding Developmental Center: 479-570-0125
- Contact Arkansas Department of Education CIRCUIT: 1-501-682-4221

Accessing Public Services

- Call the Division of Developmental Disabilities (DDS): 501-683-0870
- Complete application for Medicaid waiver, TEFRA and ARHIPP

Accessing Private Services

- Call your insurance company to determine coverage for speech therapy evaluation and treatment, occupational therapy evaluation and treatment, and applied behavior analysis for autism treatment
- Interview agencies to provide services - (see resource guide).
- If your needs are not being met at anytime, refer back to Project Connect or your case manager with the DDS for assistance.

Age 14+

Suspected Learning Difficulties

- Call Project Connect: 1-855-617-0013
 - For local resources in your region
 - Developmental screenings information
- Contact your pediatrician
- Contact Arkansas Department of Education CIRCUIT: 1-501-682-4221

Learning Difficulty Confirmed

- Contact a developmental pediatrician
 - Dennis Developmental Center: 501-364-1830
 - Schmieding Developmental Center: 479-570-0125
- Contact school and request special education evaluation

Accessing Public Services

- Call the Division of Developmental Disabilities (DDS): 501-683-0870
- Complete application for Medicaid waiver, TEFRA and ARHIPP
- Call the Arkansas Vocational Rehabilitation Services: 501-296-1600
- Contact school for transition services
- Contact the Department of Health and Human Services for disability services: 1-866-801-3435

Accessing Private Services

- Call your insurance company to determine coverage for speech therapy evaluation and treatment, occupational therapy evaluation and treatment, and applied behavior analysis for autism treatment
- Interview agencies to provide services - (see resource guide).
- If your needs are not being met at anytime, refer back to Project Connect or your case manager with the DDS for assistance.

ADULT AND EMPLOYMENT SERVICES

ABLE TALKS

Phone: 479-957-2121
Contact: Nancy Wells, LPC/Executive Director
Email: nancyewells@gmail.com
Website: abletalks.org
Address: 2254 Tall Oaks Drive, Fayetteville, AR 72703

Service Provided:

AbleTalks is an integrated, enhanced study program offered to young adults (21+) with autism, and other cognitive disabilities. Our goal is to reduce the barriers that affect reaching desired career goals and ultimately, a fulfilled life.

AbleTalks integrates independent learning, speech therapy, career counseling, and mental health therapy in order to assist adults with disabilities to achieve and enhance their career choices, leading to decreased dependency on services and increase quality of life.

Service Provided:

Arkansas Autism Adult and Employment Services

Richardson Industries: Participants earn a pay check and learn valuable job skills while they complete light assembly work at ERC's Richardson Industries. They also receive assistance with their job search with the ultimate goal of finding a meaningful job in the community.

Supported Employment: The Supported Employment team assists participants in their job search as well as providing a job coach to help with the transition into a community based position.

Ticket to Work: This federal program is designed to remove many of the employment barriers people with disabilities face, including the concern of losing health care. Under the Ticket to Work program, the Social Security Administration provides disability beneficiaries with a Ticket they may use to obtain the services and jobs they need from a group of organizations called Employment Networks. The Elizabeth Richardson Center is part of this Employment Network and is able to provide employment options in Arkansas, Oklahoma and Missouri. Beneficiaries receiving Tickets can contact ERC to discuss services and work together with our Community Employment Team. For more information, please call JoAnn Benson at (479) 601-1084 or (877) 868-6406 or email jbenson@ercinc.org.

Independent Living Options: The Elizabeth Richardson Center offers three group homes in Springdale for adults transitioning into a more independent lifestyle. Each home has ten private rooms with staff and a nurse on-site at all times. A Recreational Therapist supports the residents as they participate in community outings, sports and recreational events. ERC also offers Waiver services for adults who would like to live independently in their community.

Life Skills Day Program: Life Skills is designed to teach participants how to live independent lives. Skills such as money management, personal hygiene, math and reading skills are taught individually and in small groups. A computer lab is available and leisure activities including drama classes, arts and crafts and a shop class are offered regularly. An exercise room equipped with weights, a treadmill, exercise bicycle and a Nintendo Wii assists in keeping Life Skills participants fit and active.

Arkansas Autism Therapy Services

Services Provided: The Elizabeth Richardson Center has been serving children with disabilities in Northwest Arkansas since 1963. Our five Child Development Centers, located in Fayetteville, Farmington, Huntsville, Springdale and Siloam Springs, offer a full-day developmental program for children from six weeks to five years of age. Each center provides on-site speech, physical and occupational therapy along with an on-site nurse for children with special medical needs. Free developmental screenings are provided. The Elizabeth Richardson Center is one of the oldest non-profit organizations serving Benton, Washington and Madison counties.

THE LIVING AND LEARNING COMMUNITY (LLC) PROGRAM OF THE JONES LEARNING CENTER (JLC), UNIVERSITY OF THE OZARKS - CLARKSVILLE

Phone: 479-979-1403 JLC; 479-979-1414 (Direct –LLC)
Contact: JLC Director, Julia Frost / LLC Coordinator, Betty R. Stockton
Email: jfrost@ozarks.edu / bstockton@ozarks.edu
Address: 415 N. College, Clarksville, AR 72830

Service Provided:

The Living and Learning Community (LLC) is a program of support for the university student who is high-functioning on the autism spectrum or has other conditions that include social cognitive deficits. Forming social relationships and participating in extra-curricular activities are vital to fulfilling the college experience for residential students. Until moving to live on a college campus, many students on the spectrum are prompted through such activities by nuclear families, teachers, and other significant caregivers. They now receive help with these activities as needed from the LLC coordinator and the resident assistants (RAs). The activities mentioned above require balancing many skills as basic as waking on time and organizing living space to working on complex multi-step writing assignments that may require research, prioritizing, paraphrasing, interpreting, and synthesizing ideas from many sources. The JLC staff provides support for all academic tasks, such as writing assignments. Typically, potential students visit campus at least once prior to enrollment and learn about the single room living arrangements staffed by on-site RAs who receive specialized training in how to interact and help students on the spectrum acclimate to residential living. The coordinator of the LLC works closely with these RAs to mentor students “into” college life that is both informational and inclusionary.

The coordinator for the LLC provides programing for enrolled students based on information from direct interviews and data from the application components. Particular emphasis is given to the opinions of the individual student.

Skill based instruction to learn expected social interactions occurs daily on an individual basis. Group activities are then scheduled to practice these skills and enjoy leisure outings.

PATHFINDER, INC. - BENTONVILLE

Phone: 479-254-6717

Description:

Pediatrics Plus is a specialized pediatric healthcare provider. We are committed to helping your child succeed in all stages of life through evidence-based therapy, state of the art facilities, specialized equipment, educational interventions based on proven research, family support, and community investment.

Pediatrics Plus outpatient therapy provides occupational, physical, and speech language therapy. Our therapists provide a comprehensive evaluation focused on the specific needs of your child and family and develop an individualized treatment plan based on those needs.

Pediatrics Plus developmental preschool offers specialty sensory classrooms comprised of an excellent, well-trained staff that operates under the supervision of ABA trained occupational therapists certified in RDI and in the process of obtaining BCBA certifications. Our autism classrooms offer low teacher to student ratios, low stimulation environment, structured curriculum, small group instruction, individualized visual schedules and transitional cues.

Service Provided:**Arkansas Autism Adult and Employment Services**

Richardson Industries: Participants earn a pay check and learn valuable job skills while they complete light assembly work at ERC's Richardson Industries. They also receive assistance with their job search with the ultimate goal of finding a meaningful job in the community.

Supported Employment: The Supported Employment team assists participants in their job search as well as providing a job coach to help with the transition into a community based position.

Ticket to Work: This federal program is designed to remove many of the employment barriers people with disabilities face, including the concern of losing health care. Under the Ticket to Work program, the Social Security Administration provides disability beneficiaries with a Ticket they may use to obtain the services and jobs they need from a group of organizations called Employment Networks. The Elizabeth Richardson Center is part of this Employment Network and is able to provide employment options in Arkansas, Oklahoma and Missouri. Beneficiaries receiving Tickets can contact ERC to discuss services and work together with our Community Employment Team. For more information, please call JoAnn Benson at (479) 601-1084 or (877) 868-6406 or email jbenson@ercinc.org.

Address: 6601 Phoenix Avenue, Fort Smith, AR 72903

Service Provided:

- **Developmental Assessment and Early Intervention:** A developmental evaluation to highlight the child's strengths and needs and determine a plan of action for meeting developmental milestones.
- **Nutrition Services:** Assessment and consultation, therapeutic diets, and menu development.
- Speech, Occupational, and Physical Therapy
- **Medical and Registered Nurses:** A clinical coordinator will monitor and communicate the child's health needs to everyone involved with the child's care. All services at KIDS FIRST are provided under the direction of one of our medical directors, a faculty member of the UAMS Department of Pediatrics.
- **Social Work Services:** As part of a child's treatment team, social workers provide continued support and advocacy throughout the child's tenure in the program.
- **Project Nurture-Infant Mental Health:** Project that provides guidance for staff and families in working with infants/toddlers to promote and support optimal social-emotional development during the first three years of life.
- **Behavioral Consultation:** Incorporating the clinic staff and the child's family in the child's behavioral treatment plan so that each child is surrounded by encouragement in all of their living environments. Board Certified Behavioral Analyst on staff.

Services at **KIDS FIRST** clinics are tailored to meet the individual needs of children and families. Health monitoring, preventative health care, developmental intervention, positive early relationships, therapeutic services, and family centered-care are the core of the KIDS FIRST program.

HIPPY (Home Instruction for Parents of Preschool Youngsters) is a home-based early childhood education program for parents of three, four, and some five year old children. All HIPPY programs include the following components:

- A thirty wee curriculum that is developmentally appropriate
- A professional coordinator and staff of home-based educators
- Role-play as the technique for teaching parents the activities
- Service delivery through home visits and group meetings

LEISURE / AFTER SCHOOL / SUMMER CAMPS

AMC FIESTA SQUARE 16

Phone: 479-575-0026
Website: www.amctheaters.com/programs/sensory-friendly-films

Address: 3033 North College Fayetteville, AR 72703

Service Provided:

AMC is proud to partner with the Autism Society to bring you unique movie showings where you can feel free to be you! We turn the lights up, and turn the sound down, so you can get up, dance, walk, shout or sing!

We are now expanding our Sensory Friendly Film program into four showings per month. Monthly showings are every 2nd and 4th Tuesday and Saturday of the month. Saturday showings will still be family-friendly movies starting at 10:00am local time. Tuesday showings will now include movies that appeal to others on the autism spectrum, we want to continue to grow with our guests, starting at 10am local time.

BRICKS 4 KIDZ

Phone: 479-439-9451

Contact: Shaista Sandhu

Email: ssandhu@bricks4kidz.com

Website: www.brick44kidz.com

Address: 5208 Village Parkway, Suite 5, Rogers, AR 72758

Service Provided:

Bricks 4 Kidz classes provide an extraordinary atmosphere for children, where we learn, we build, we play... with LEGO® Bricks. Programs are built around our proprietary model plans, designed by engineers and architects, with exciting themes such as space, construction, and amusement parks. Our specially designed project kits and theme-based models provide the building blocks for the Bricks 4 Kidz approach to educational play. At Bricks 4 Kidz, we believe that kids learn best through activities that engage their curiosity and creativity.

We offer activities for children ages 3-13+, including:

- After-school enrichment classes
- Week-long summer camps
- Birthday parties
- Preschool classes
- Kidz Night Out

Our programs provide a safe, relaxed learning environment where initiative is invited and self-expression is celebrated. Model building provides opportunities for problem-solving and helps kids develop an appreciation for how things work. All this takes place while kids are having fun and socializing in a non-competitive atmosphere.

CAMP CONNECT

Phone: 479-575-3215

Contact: Hollie Lawless

Email: projconn@uark.edu

Address: 410 Arkansas Ave, Fayetteville, AR 72701

Service Provided:

Camp Connect is a summer day camp program for children ages 5-12 with autism. The purpose of Camp Connect is for children with autism to have fun while connecting with other children who may or may not have autism. Each child with autism is paired with a peer mentor and a behavior technician student to maximize success. Each camper with autism will leave camp with an overview of performance and a support plan for extending the activities into the home or school setting. There are two separate weeks offered, one week is for advanced learners while the second week is for intermediate learners. All activities are observed by behavior technicians and Board Certified Behavior Analysts.

Address: P.O. Box 10702, Fayetteville, AR 72703-0047

Service Provided:

We provide weekly P.E. classes for preschool students ages 2 ½-5 years old. The classes are 30 minutes in length and help students develop abilities in all areas of exercise—flexibility, strength, aerobic fitness, and balance. We use music, props, games, and activities in a non-competitive atmosphere to help our students have fun and develop a positive view of exercise and healthy living. Students are also taught a short lesson each week on nutrition, safety, hygiene, muscles, and other health topics.

PRIVATE SCHOOLS

THE GRACE SCHOOL (NORTHWEST ARKANSAS CENTER FOR AUTISM AND DEVELOPMENTAL DISABILITIES)

Phone: 479-871-7994
Contact: Beth McKee
Email: beth.mckee@nwacenterforautism.com or
Ryanlawson@nwacenterforautism.com
Address: 2458 E. Joyce Blvd. Fayetteville, AR 72703

Service Provided:

Clinic: Treatment is provided in a 1:1 clinic setting with opportunities to engage with peers in small groups throughout the day. Students may attend a year round full day program 5 days a week (6 hours) or a half day program 5 days a week (4 hours). Sessions are based on availability and the students need, there is no age restriction for students eligible for the clinic. Based on your child's individual needs and learning style, the Clinic Director designs a unique treatment program that uses evidence based treatments derived from the principles and methods of Applied Behavior Analysis and Verbal Behavior. These may include: discrete trial teaching, pivotal response treatment, natural environment teaching, incidental teaching, direct instruction, social skills development, behavior reduction strategies and more, using these methods, treatment can improve communication, social, intellectual, and play skills. Services can also help with daily living skills, such as sleeping through the night and potty training. Children must also learn to generalize the new skills, that is, to perform them not just with their therapist, but for anyone in all appropriate situations. Each child's program is designed to promote generalization by teaching skills with a team of therapists, including children's first teachers, their parents.

The Grace School: The school program offers a year round center-based full-day program (6 hours) to students ages 6-18 with autism, learning disabilities, ADHD, and other developmental disabilities in a classroom based atmosphere. The goal of the program is to help each student achieve his or her full potential. Programming often includes goals in communication, academics, social skills, self-help skills, and the promotion of adaptive behavior. The philosophy of the school is to employ effective and efficient research based teaching strategies to support the success of the learner. Teaching practices such as precision teaching, direct instruction, self-management, discrete trial teaching, and video modeling are utilized to support each student's success. Monthly parent training is an integral part of treatment.

*****Training:** The Center and The Grace School acknowledge the importance of ongoing staff training to ensure quality services. Staff receive training with scholars in the field of Applied Behavior Analysis, Direct Instruction, and Precision Teaching. The Grace School staff have received training and consultation with Michael Maloney, author of the Teach Your Children Well curriculum as well as Kent Johnson, proprietor of The Morningside Model of Generative Instruction.

Arkansas Autism Adult and Employment Services

Richardson Industries: Participants earn a pay check and learn valuable job skills while they complete light assembly work at ERC's Richardson Industries. They also receive assistance with their job search with the ultimate goal of finding a meaningful job in the community.

Supported Employment: The Supported Employment team assists participants in their job search as well as providing a job coach to help with the transition into a community based position.

Ticket to Work: This federal program is designed to remove many of the employment barriers people with disabilities face, including the concern of losing health care. Under the Ticket to Work program, the Social Security Administration provides disability beneficiaries with a Ticket they may use to obtain the services and jobs they need from a group of organizations called Employment Networks. The Elizabeth Richardson Center is part of this Employment Network and is able to provide employment options in Arkansas, Oklahoma and Missouri. Beneficiaries receiving Tickets can contact ERC to discuss services and work together with our Community Employment Team. For more information, please call JoAnn Benson at (479) 601-1084 or (877) 868-6406 or email jbenson@ercinc.org.

Independent Living Options: The Elizabeth Richardson Center offers three group homes in Springdale for adults transitioning into a more independent lifestyle. Each home has ten private rooms with staff and a nurse on-site at all times. A Recreational Therapist

supports the residents as they participate in community outings, sports and recreational events. ERC also offers Waiver services for adults who would like to live independently in their community.

Life Skills Day Program: Life Skills is designed to teach participants how to live independent lives. Skills such as money management, personal hygiene, math and reading skills are taught individually and in small groups. A computer lab is available and leisure activities including drama classes, arts and crafts and a shop class are offered regularly. An exercise room equipped with weights, a treadmill, exercise bicycle and a Nintendo Wii assists in keeping Life Skills participants fit and active.

Arkansas Autism Therapy Services

Services Provided: The Elizabeth Richardson Center has been serving children with disabilities in Northwest Arkansas since 1963. Our five Child Development Centers, located in Fayetteville, Farmington, Huntsville, Springdale and Siloam Springs, offer a full-day developmental program for children from six weeks to five years of age. Each center provides on-site speech, physical and occupational therapy along with an on-site nurse for children with special medical needs. Free developmental screenings are provided. The Elizabeth Richardson Center is one of the oldest non-profit organizations serving Benton, Washington and Madison counties.

Address: 2458 E. Joyce Blvd. Fayetteville, AR 72703

Service Provided:

Clinic: Treatment is provided in a 1:1 clinic setting with opportunities to engage with peers in small groups throughout the day. Students may attend a year round full day program 5 days a week (6 hours) or a half day program 5 days a week (4 hours). Sessions are based on availability and the students need, there is no age restriction for students eligible for the clinic. Based on your child's individual needs and learning style, the Clinic Director designs a unique treatment program that uses evidence based treatments derived from the principles and methods of Applied Behavior Analysis and Verbal Behavior. These may include: discrete trial teaching, pivotal response treatment, natural environment teaching, incidental teaching, direct instruction, social skills development, behavior reduction strategies and more, using these methods, treatment can improve communication, social, intellectual, and play skills. Services can also help with daily living skills, such as sleeping through the night and potty training. Children must also learn to generalize the new skills, that is, to perform them not just with their therapist, but for anyone in all appropriate situations. Each child's program is designed to promote generalization by teaching skills with a team of therapists, including children's first teachers, their parents.

The Grace School: The school program offers a year round center-based full- day program (6 hours) to students ages 6-18 with autism, learning disabilities, ADHD, and other developmental disabilities in a classroom based atmosphere. The goal of the program is to help each student achieve his or her full potential. Programming often includes goals in communication, academics, social skills, self-help skills, and the promotion of adaptive behavior. The philosophy of the school is to employ effective and efficient research based teaching strategies to support the success of the learner. Teaching practices such as precision teaching, direct instruction, self-management, discrete trial teaching, and video modeling are utilized to support each student's success. Monthly parent training is an integral part of treatment.

*****Training:** The Center and The Grace School acknowledge the importance of ongoing staff training to ensure quality services. Staff receive training with scholars

in the field of Applied Behavior Analysis, Direct Instruction, and Precision Teaching. The Grace School staff have received training and consultation with Michael Maloney, author of the Teach Your Children Well curriculum as well as Kent Johnson, proprietor of The Morningside Model of Generative Instruction.

Description:

Pediatrics Plus is a specialized pediatric healthcare provider. We are committed to helping your child succeed in all stages of life through evidence-based therapy, state of the art facilities, specialized equipment, educational interventions based on proven research, family support, and community investment.

Pediatrics Plus outpatient therapy provides occupational, physical, and speech language therapy. Our therapists provide a comprehensive evaluation focused on the specific needs of your child and family and develop an individualized treatment plan based on those needs.

Pediatrics Plus developmental preschool offers specialty sensory classrooms comprised of an excellent, well-trained staff that operates under the supervision of ABA trained occupational therapists certified in RDI and in the process of obtaining BCBA certifications. Our autism classrooms offer low teacher to student ratios, low stimulation environment, structured curriculum, small group instruction, individualized visual schedules and transitional cues.

A CARF accredited organization, Thrive Autism Solutions delivers Applied Behavior Analysis (ABA) therapy to children 24 months to 21 years old. All therapy is overseen by Board Certified Behavior Analysts.

Kids have no limits. Thrive Autism Solutions is a science-based organization that not only collects data, but applies it, improving the functioning of children, families and our

company. Using evidence-based interventions, we optimize a child's potential and increase his families' happiness, one celebrated step at a time.

This is our mission and we are zealous about it. We believe it. We live it. It's the reason Thrive Autism Solutions exists.

Thrive Autism Solutions' core values shape our actions at all times:

- Give hope through knowledge;
- Create fun and happiness;
- Be passionate and determined;
- Learn from everyone and everything;
- Celebrate growth and success;
- Set standards for integrity; and
- Apply science--make data-based decisions.

And we do all of this because of our cornerstone value: kids have no limits. Every one of us is here because we passionately believe that kids have the capacity to learn, grow and thrive.

Service Provided:

Community Connections' Autism Resource Center of Arkansas offers:

- Parent Consultations
- Camp Connect (Summer Day Camp)
- The Young Adults with Autism/Other Disabilities Group
- An Autism Resource Guide
- Educational/Support Workshops
- A Resource Library

Parent Consultations

The Autism Resource Center offers consultations for families dealing with an autism spectrum disorder. Maybe a child you love has just been diagnosed. Or you are struggling to get your child the services he or she needs. Maybe you just need help filling out all those applications for financial aid. Let us help! If we don't know the answer, we know someone who does.

Camp Connect

Camp Connect is a week-long summer day camp designed for children with social skills difficulties caused by high-functioning autism spectrum disorders, attention deficit disorders, sensory processing disorders, and related differences. Camp Connect is led by an occupational therapist and occupational therapy students. Through small group and community activities, Camp Connect kids learn appropriate social skills and gain the confidence to use them. Camp activities are geared towards personal growth and learning to work as a team. They also teach problem-solving, real-world dynamic thinking, and adaptive skills.

Young Adults Group

The Conway Young Adults with Autism Group exists to provide individuals aged 15-25 an opportunity to come together and socialize with people who share similar experiences. This group meets to socialize, form friendships, engage in activities, and enjoy outings together! This group meets the first Saturday of the month from 2:30 p.m. – 5:00 p.m. at the Faulkner County Library in Conway. For more information, contact Tommy Brown at (501) 514-2817 or tommybrowncc@gmail.com.

Autism Resource Guide

Our Autism Resource Guide is an easy-to-read manual for families who have a child recently diagnosed with an ASD, or who have recently moved to the state of Arkansas. This handbook addresses financial aid, therapy interventions, school services, and much more. Download the resource guide at www.communityconnectionsar.org.

Educational/Support Workshops

We offer a fall and spring educational/support workshops covering various topics related to raising a child with autism/related disorders. We welcome recommendations

on topics that would help you in your walk with a child with ASD. Information on the spring workshop will be coming soon.

Resource Library

Community Connections has over 100 books/dvds available to check out, free of charge. We will mail materials anywhere in the state & do take recommendations for additions to the library. A list of materials can be viewed at www.communityconnectionar.org. To check out a book, or for more information, please contact Courtney at Courtney@CommunityConnectionsAR.org.

In addition to our Autism Resource Center, Community Connections also provides free extra-curricular activities for children with special needs. Our programs include soccer, art, football, theater, golf, cheerleading, music, and martial arts.

CORNERSTONE ABA SERVICES

Phone: 501-940-4435

Service Provided:

- **Developmental Assessment and Early Intervention:** A developmental evaluation to highlight the child's strengths and needs and determine a plan of action for meeting developmental milestones.
- **Nutrition Services:** Assessment and consultation, therapeutic diets, and menu development.
• Speech, Occupational, and Physical Therapy
- **Medical and Registered Nurses:** A clinical coordinator will monitor and communicate the child's health needs to everyone involved with the child's care. All services at KIDS FIRST are provided under the direction of one of our medical directors, a faculty member of the UAMS Department of Pediatrics.
- **Social Work Services:** As part of a child's treatment team, social workers provide continued support and advocacy throughout the child's tenure in the program.
- **Project Nurture-Infant Mental Health:** Project that provides guidance for staff and families in working with infants/toddlers to promote and support optimal social-emotional development during the first three years of life.
- **Behavioral Consultation:** Incorporating the clinic staff and the child's family in the child's behavioral treatment plan so that each child is surrounded by encouragement in all of their living environments. Board Certified Behavioral Analyst on staff.

Services at **KIDS FIRST** clinics are tailored to meet the individual needs of children and families. Health monitoring, preventative health care, developmental intervention, positive early relationships, therapeutic services, and family centered-care are the core of the KIDS FIRST program.

Address: 10310 W. Markham St., Suite 211, Little Rock, AR 72205

Service Provided:

Best Buddies Arkansas provides school friendship programs matching students with intellectual and developmental disabilities with nondisabled peers through school Best Buddies chapters. Students commit to one-to-one friendships for at least one academic year. Chapter officers receive leadership training along with the chapter buddy director who attend a national leadership conference each year. As Best Buddies expands in Arkansas, future programs can include a citizens program for adults and a jobs program.

COMMUNITY CONNECTIONS

Phone: 501-733-1627
Email: Courtney@CommunityConnectionsAR.org
Address: 2740 College Avenue, Conway, AR 72034

Service Provided:

Community Connections' Autism Resource Center of Arkansas offers:

- Parent Consultations
- Camp Connect (Summer Day Camp)
- The Young Adults with Autism/Other Disabilities Group

- An Autism Resource Guide
- Educational/Support Workshops
- A Resource Library

Parent Consultations

The Autism Resource Center offers consultations for families dealing with an autism spectrum disorder. Maybe a child you love has just been diagnosed. Or you are struggling to get your child the services he or she needs. Maybe you just need help filling out all those applications for financial aid. Let us help! If we don't know the answer, we know someone who does.

Camp Connect

Camp Connect is a week-long summer day camp designed for children with social skills difficulties caused by high-functioning autism spectrum disorders, attention deficit disorders, sensory processing disorders, and related differences. Camp Connect is led by an occupational therapist and occupational therapy students. Through small group and community activities, Camp Connect kids learn appropriate social skills and gain the confidence to use them. Camp activities are geared towards personal growth and learning to work as a team. They also teach problem-solving, real-world dynamic thinking, and adaptive skills.

Young Adults Group

The Conway Young Adults with Autism Group exists to provide individuals aged 15-25 an opportunity to come together and socialize with people who share similar experiences. This group meets to socialize, form friendships, engage in activities, and enjoy outings together! This group meets the first Saturday of the month from 2:30 p.m. – 5:00 p.m. at the Faulkner County Library in Conway. For more information, contact Tommy Brown at (501) 514-2817 or tommybrowncc@gmail.com.

Autism Resource Guide

Our Autism Resource Guide is an easy-to-read manual for families who have a child recently diagnosed with an ASD, or who have recently moved to the state of Arkansas. This handbook addresses financial aid, therapy interventions, school services, and much more. Download the resource guide at www.communityconnectionsar.org.

Educational/Support Workshops

We offer a fall and spring educational/support workshops covering various topics related to raising a child with autism/related disorders. We welcome recommendations on topics that would help you in your walk with a child with ASD. Information on the spring workshop will be coming soon.

Resource Library

Community Connections has over 100 books/dvds available to check out, free of charge. We will mail materials anywhere in the state & do take recommendations for additions to the library. A list of materials can be viewed at www.communityconnectionar.org. To check out a book, or for more information, please contact Courtney at Courtney@CommunityConnectionsAR.org.

In addition to our Autism Resource Center, Community Connections also provides free extra-curricular activities for children with special needs. Our programs include soccer, art, football, theater, golf, cheerleading, music, and martial arts.

BEYOND BOUNDARIES

Phone: 501-941-1522
Email: beyondboundarie@centurytel.net OR bboundaries@allied-therapy.com
Address: 2195 Peyton/Hwy. 319, Ward, AR 72176

Service Provided:

Our facility provides both therapeutic riding and hippotherapy services. . Hippotherapy is a treatment strategy utilized by licensed speech, occupational and physical therapists using the horse as an actual therapy aid. The horse is the only animal whose pelvic movement mimics that of a human. Due to the multidimensional movement created by the horse which is rhythmic and repetitive, the horse provides a foundation and base for our riders to improve balance, trunk control and core strength. The dynamic outdoor environment also makes hippotherapy an ideal tool for children with sensory issues such as autism spectrum disorders. Therapeutic riding instruction is performed by a certified instructor and follows the format of a modified riding lesson taking into consideration safety measures specific to each rider's abilities. Beyond Boundaries is partnered with Allied Therapy who provides licensed therapists all of whom are certified level one hippotherapists.

COBALT - COMMUNITY-BASED AUTISM LIAISON AND TREATMENT PROJECT - THE CHILDREN'S CLINIC

Phone: 870-534-6210

Service Provided:

The UALR Pragmatics Groups are provided by the UALR Speech and Hearing Clinic and are designed for children seven to sixteen years of age. One group is for children 7-9 years of age and is offered during the fall and spring terms. Another group is for children 10-12 years of age and is also offered during the fall and spring terms. The Teen Group is for children 13-16 years of age and is offered in the summer term. The program stresses the social use of language during social interactions and social skills are taught in a group setting of six to eight children. The groups are designed to provide a safe yet challenging environment within which a full range of relationship skills and competencies can develop in the context of games and fun activities. Close contact with parents is maintained through weekly letters to help support the social skills the children are working to achieve.

Service Provided:

The Early Childhood Special Education Program provides special education services for children with disabilities from 3 to 5 years of age who meet eligibility under Public Law 99-457. Early Childhood Special Education Services are provided in a manner which meet the individual developmental/educational needs of each child, which

may include screening, evaluation, speech/language therapy, direct or consulting developmental instruction, counseling, physical therapy, and occupational therapy.

DEQUEEN MENA EDUCATIONAL COOPERATIVE

Phone: 870-386-2251
Contact: Diana Hicks
Email: diana.hicks@dmesc.org
Website: www.dmesc.net
Address: PO Box 110 / 305 S Hornberg Ave, Gillham, AR 71841

Service Provided:

The 3-5 Early Childhood Program takes responsibility for coordinating efforts within the region to develop and establish programs providing special education and related services to identified preschool aged children (3-5 years) with developmental delays. The program collaborates in planning with the LEAs and superintendents in their districts for implementing activities to ensure the identification of eligible children. Provides services to such children in accordance with individual educational plans developed for children with the least restrictive environment being the primary concern.

SOUTH CENTRAL EDUCATION SERVICE COOPERATIVE

Phone: 870-836-1600
Email: marsha.daniels@scscoop.org
Address: 2235 California Ave SW, Camden, AR 71701

Service Provided:

The goal of the Early Childhood Department is to identify, locate, and provide services to children ages 3-5 in our co-op area. Children may qualify for services under IDEA or the Arkansas Better Chance/Arkansas Better Chance for School Success programs. Available Services: Hearing Screening, Vision Screening, Speech/Language Screening, Physical Therapy, Occupational Therapy, Developmental Instruction in reasoning/thinking skills, large and small muscle skills, self-help skills, social skills and language skills.

SOUTHWEST ARKANSAS EDUCATION COOPERATIVE

Phone: 870-777-3076
Email: phoebe.bailey@swaec.org
Address: 2502 South Main, Hope, AR 71801

Service Provided:

The 3-5 Early Childhood Program takes responsibility for coordinating efforts within the region to develop and establish programs providing special education and related services to identified preschool aged children (3-5 years) with developmental delays. The program collaborates in planning with the LEAs and superintendents in their districts for implementing activities to ensure the identification of eligible children. Provides services to such children in accordance with individual educational plans developed for children with the least restrictive environment being the primary concern.

EARLY INTERVENTION SERVICES

FIRST STEP - FORDYCE

Phone: 870-352-7975
Website: <http://www.firststeparkansas.com/>
Address: 1717 Industrial Drive Fordyce, AR 71742

Service Provided:

- Children services-Early intervention, developmental treatment and school-age developmental treatment programs
- Adult services-various programs and services, day program, supported employment and residential living

FIRST STEP - GLENWOOD

Phone: 870-356-3622
Website: <http://www.firststeparkansas.com/>
Address: 167 South Spur Eight Glenwood, AR 71943

Service Provided:

- Children services-Early intervention, developmental treatment and school-age developmental treatment programs
- Adult services-various programs and services, day program, supported employment and residential living

FIRST STEP - SPARKMAN

Phone: 870-678-2201
Website: <http://www.firststeparkansas.com/>
Address: 213 East Main Sparkman, AR 71763

Service Provided:

- Children services-Early intervention, developmental treatment and school-age developmental treatment programs
- Adult services-various programs and services, day program, supported employment and residential living

UAMS/KIDS FIRST PROGRAM - MAGNOLIA

Phone: 870-231-1597
Contact: Tommye Doherty, Clinic Director
Email: TGDoherty@uams.edu
Website: <http://www.arpediatrics.org/kidsfirst/>
Address: 301 West Calhoun, Magnolia AR 71753

Service Provided:

- **Developmental Assessment and Early Intervention:** A developmental evaluation to highlight the child's strengths and needs and determine a plan of action for meeting developmental milestones.
- **Nutrition Services:** Assessment and consultation, therapeutic diets, and menu development.
- Speech, Occupational, and Physical Therapy
- **Medical and Registered Nurses:** A clinical coordinator will monitor and communicate the child's health needs to everyone involved with the child's care. All services at KIDS FIRST are provided under the direction of one of our medical directors, a faculty member of the UAMS Department of Pediatrics.
- **Social Work Services:** As part of a child's treatment team, social workers provide continued support and advocacy throughout the child's tenure in the program.
- **Project Nurture-Infant Mental Health:** Project that provides guidance for staff and families in working with infants/toddlers to promote and support optimal social-emotional development during the first three years of life.
- **Behavioral Consultation:** Incorporating the clinic staff and the child's family in the child's behavioral treatment plan so that each child is surrounded by encouragement in all of their living environments. Board Certified Behavioral Analyst on staff.

Services at **KIDS FIRST** clinics are tailored to meet the individual needs of children and families. Health monitoring, preventative health care, developmental intervention, positive early relationships, therapeutic services, and family centered-care are the core of the KIDS FIRST program.

OTHER

COBALT - COMMUNITY-BASED AUTISM LIAISON AND TREATMENT PROJECT- ALL FOR KIDS PEDIATRIC CLINIC (*Diagnostic and screening*)

Phone: 870-779-6120
Contact: Belinda Hutchinson, MD
Website: <http://www.arpediatrics.org/specialties/developmental-pediatrics/cobalt-program>
Address: 300 E 6th Street, Texarkana, AR 71854

Service Provided:

Comprehensive diagnostic assessments, early intervention services, and family support.

COBALT - COMMUNITY-BASED AUTISM LIAISON AND TREATMENT PROJECT - EL DORADO CLINIC (*Diagnostic and screening*)

Phone: 870-862-8221
Contact: Robin Ray, MD
Website: <http://www.arpediatrics.org/specialties/developmental-pediatrics/cobalt-program>
Address: 403 W Oak Street #301, El Dorado, AR 71730

Service Provided:

Comprehensive diagnostic assessments, early intervention services, and family support.

THERAPY SERVICES

MILLCREEK OF ARKANSAS

Phone: 870-352-8203 EXT. 202
Email: nathan.chennault@millcreekcenters.com
Address: 1828 Industrial Dr Fordyce, AR 71742

Service Provided:

Individualized therapy, social skills, community interaction, spiritual enrichment, DBT, ABA, medication management, PRTF, residential, ICFIID residential, occupational therapy, physical therapy, speech language therapy

ADULT AND EMPLOYMENT SERVICES

FIRST STEP - HAMBURG

Phone: 870-853-0857
Website: <http://www.firststeparkansas.com/>
Address: 1036 South Main Hamburg, AR 71646

Service Provided:

- Children services-Early intervention, developmental treatment and school-age developmental treatment programs
- Adult services-various programs and services, day program, supported employment and residential living

GLOSSARY

Academic Interventions - the use of traditional teaching methods to improve academic performance.

Adapted Physical Education (APE) – a program that provides instruction to meet individual student needs in the development of motor skills, physical fitness, and self-image.

Advocate – a person that works for the rights and needed services of a disabled individual. That person can be the parent, guardian, or a professional.

Antecedent Based Intervention - Modification of situational events that typically precede the occurrence of a target behavior.

Assessment – an assessment provides an accurate and thorough understanding of a child’s strengths and weaknesses. There are several tests used to determine cognition/developmental levels, social and emotional skills, sensory regulation, motor skills, behavior, play/leisure activities, pre-academic/academic skills, self-help, independent living skills, pre-vocational/vocational skills, and community based skills. The results of the assessment are integrated into the IFSP and IEP.

Assessment Team – a team that gathers information for decision-making. In addition to parents, this team can include a Psychologist, Speech Therapist, Adapted Physical Education Specialist, Nurse, Family Facilitator, Teacher and Administrator.

Augmentative & Alternative Communication Device - use of a high or low tech device to assist with communication.

Behavioral Package - Interventions designed to reduce problem behavior and teach functional alternative behaviors or skills through the application of basic principles of behavior change.

Case Manager – the primary person responsible for coordinating a child’s services; works in partnership with the family and providers of special programs.

Child Find - A federal program that requires states to actively identify children, birth to age 21, with developmental disabilities or who are at risk for developmental disabilities, focusing on individuals not enrolled in school programs.

- Cognitive/Cognition** – term that describes the mental process people use for remembering, reasoning, understanding, and using judgment.
- Cognitive Behavioral Intervention** - Instruction on management or control of thoughts that lead to changes in behavior
- Comprehensive Behavioral Treatment for Young Children** - a combination of applied behavior analytic procedures that are delivered to young children.
- Curriculum** – a master teaching plan in which the specific features reflect the skills, tasks, and behaviors that a school or program has decided are important for children to acquire.
- Developmental Relationship-based Treatment** - a combination of procedures based on developmental theory and emphasizes the importance of building social relationships (e.g. the Denver Model, Relationship Development Intervention, Responsive Teaching).
- Diagnostic and Statistical Manual, 5th edition (DSM-V)** – Most recent version of the American Psychological Association’s classification and description of all mental health disorders for children and adults.
- Differential reinforcement** – providing a desirable consequence only for an appropriate replacement behavior and withholding a consequence for an undesired behavior that results in a reduction
- Discrete Trial Training (DTI)** – specific training procedures based on principles of applied behavior analyses that simplify learning into small segments that a child can more easily master. This form of therapy can be beneficial in eliminating unwanted behaviors as well as encouraging positive behaviors.
- Due Process** – a legal statement that certain principles and practices exist and must be respected in order to ensure that each child is treated in a manner that guarantees his/her rights to equal education opportunities.
- Early Intervention** – program or services designed to identify and treat a developmental problem as early as possible, usually before the age of 3.
- Echolalia** - the immediate or delayed involuntary repetition of words or phrases just spoken by others.
- Evaluation** – a way of collecting information about a student’s learning needs, strengths, and interests. An evaluation is part of the process of determining whether a student qualifies for special education programs and services.

- Exercise Intervention** - involves increasing physical exertion as a means of reducing problem behaviors and increasing appropriate behaviors.
- Exposure Package** - increasingly exposing an individual with ASD to anxiety-provoking situations and preventing the use of maladaptive strategies.
- Expressive Language** – what is said or written to communicate an idea or a question.
- Extinction** - withdrawal or removal of a consequence that maintains a challenging behavior that results in its reduction. Typically used with differential reinforcement, functional behavior assessment, and/or functional communication training.
- Facilitated Communication** - involves having a facilitator support the arm/hand of an individual with limited communication skills as they use a communication board or typing device.
- Family Education Rights and Privacy Act (FERPA)** - Federal law that protects the privacy and transfer of student education records.
- Fine Motor** – in physical development, the use of the small muscles of the body, especially the hands and fingers.
- Functional Behavior Assessment (FBA)** - process for collecting data on the child's behaviors and the environment in order to determine the possible causes of the problem behavior and to identify specific strategies to address those behaviors.
- Functional Communication Training (FCT)** – Teaching an individual to use an appropriate communicative behavior that serves the same purpose as the challenging behavior. Typically used with functional behavior assessment, extinction, and differential reinforcement.
- Gluten- and Casein-Free Diet** - the elimination of one's intake of naturally occurring proteins gluten and casein.
- Gross Motor** – in physical development, the use of the large muscles of the body for activities such as running, climbing, throwing and jumping.
- Health Insurance Portability Accountability Act (HIPAA)** - Federal regulation outlining the confidentiality and protection of medical records.
- Home Visit** – the visit of an intervention staff member to a child's home to talk with the parents about their child's school progress, IEP; demonstrate activities and share ideas and materials.

Imitation-based Interaction - relies on adults imitating the actions of the individual with ASD.

Inclusion – the placement of students with disabilities in classrooms with typically developing students of the same age. Full inclusion has two central features: moving students with disabilities into regular education classrooms and sending special education support services into those same classrooms.

Individualized Education Program (IEP) – an IEP outlines your child’s unique education plan by defining broad goals and specific objectives for the school year, the services needed to implement those goals and objectives, and a method of evaluating your child’s progress. The IEP must include a report of the child’s present academic and non-academic performance, a statement of annual goals which may be reasonably accomplished within the next 12 months, and the specific special educational instruction and related services required to achieve the goals by the child.

Individualized Family Service Plan (IFSP) – an IFSP is a written plan for providing early intervention services to eligible children and their families. It must include a statement of the infant or toddler’s present levels of physical development including hearing, vision and health status. The IFSP must include a statement of the specific early intervention services necessary to meet the unique needs of the child and family to achieve identified goals.

Initiation Training - directly teaching individuals with ASD to initiate interactions with their peers.

Interdisciplinary – a term which describes professionals who work jointly with the child in the same environment but each work within their “defined roles”. Each staff member fulfills designated responsibilities. Group decisions and recommendations may occur but the staff roles determine who carries out those recommendations.

Intervention – design for changing an individual’s behavioral, educational, medical or health status or a change in the program itself. Joint Attention Intervention - involves building foundational skills involved in regulating the behavior of others (ex. pointing and eye gaze).

Language – a structured system of symbols, spoken or written, used in interpersonal communication. There are four major components of language. (1) Phonology describes how to put sounds together to form words. (2) Syntax describes how to put words together to form sentences. (3) Semantics describes how to interpret the meaning of words and

sentences. (4) Pragmatics describes how to participate in a conversation, how to sequence sentences, and how to anticipate the information needed by the listener.

Language Training (Production) - Interventions with the primary goal of speech production.

Language Training (Production and Understanding) - Interventions with the goal increasing of speech production and understanding of communicative acts.

Least Restrictive Environment (LRE) – placement or program that can best meet the individual student’s needs and which does so with a minimum loss of contact with regular programs. The intent is to place the child with exceptional needs in a program as close to a regular school program as possible.

Mainstreaming – refers to the placement of children with handicaps into educational programs for and with normally developing children.

Modeling - relies on an adult or peer providing a demonstration of the target behavior that should result in an imitation of the target behavior by the individual with ASD.

Multi-component Package - uses a combination of multiple treatment procedures from different theoretical orientations.

Naturalistic Intervention* - using primarily child-directed interactions to teach functional skills in the natural environment.

Occupational Therapy (OT) – a therapy or treatment provided by an occupational therapist that helps individual development or physical skills that will aid in daily living. It focuses on sensory integration, coordination of movement, and on fine motor and self-help skills, such as dressing and eating with utensils.

Parent-implemented instruction and intervention - parents provide individual skill instruction with their child after receiving structured training on how to promote skill acquisition and reduce interfering behaviors.

Peer-mediated Instruction & Intervention - interventions that target academic, communication, or social skills by involving same-aged peers in the learning process.

Perception – the process of organizing or interpreting the information obtained through the five senses.

Physical Therapy (PT) – services provided by trained physical therapists, in the general area of motor performance, to help the person improve the use of bones, muscles, joints and nerves.

Picture Exchange Communication System (PECS) - utilization of a specific augmentative and alternative communication system designed to teach functional communication.

Pivotal Response Training (PRT) - focuses on targeting pivotal areas of behavior (i.e. social communication, self-management), parental involvement in delivery of intervention, and delivery in natural environment.

Placement – unique combination of facilities, personnel, location and equipment necessary to provide instructional services to an individual with exceptional needs as specified in the IEP.

Prompting – Physical, visual, or verbal assistance to increase the likelihood that an individual performs a correct response

Public Law 94-142 – The Education for All Handicapped Children Act of 1975, is a federal law that mandates and affirms the right of all children to a free and appropriate public education.

Public Law 99-457 – an amendment to P.L. 94-142 passed in 1986, which requires states to provide a free and appropriate public education to all children ages 3-5. The amendment also provides funds for states to offer programs and services to infants and children (ages birth through 2 yrs.) with disabilities.

Receptive Language – language that is spoken or written by others and received by the individual. Receptive language skills are listening and reading.

Reductive Package - interventions that rely on strategies designed to reduce problem behaviors with no effort to increase appropriate alternatives.

Reinforcement - an event that occurs after a response (whether natural or programmed) that results in an increased likelihood of the response in the future.

Resource Teacher – a specialist responsible for coordinating curriculum, consulting with teachers concerning all aspects of classroom management, and providing program information to site offices and staff. The resource teacher also maintains class rosters and arranges placement of students.

Response Interruption and Redirection – Inserting a prompt, comment, or when an individual is engaging in interfering behavior in order to direct their attention to another verbal or motor response.

Schedules - involves presenting a visual (e.g., pictures, printed words, or both) that indicates the activities of the day or individual steps of a multi-step task.

Scripting - an intervention in which a verbal/written script is developed that serves as a model for the individual with ASD.

Self-Management - promotes independence by teaching individuals with ASD to regulate their behavior.

Sensory Integrative Package - establishing an environment that stimulates or challenges the individual to effectively use all of their senses as a means of addressing overstimulation or understimulation from the environment.

Sign Instruction - interventions that directly teach sign language as a means of communication.

Self-stimulatory Behavior - repetitive, stereotyped, atypical behaviors (e.g. head banging, hand-flapping).

Sensorimotor Integration – term applied to the combination of the input of sensation and the output of motor activity.

Social Communication Intervention - psychosocial intervention that involve targeting a combination of pragmatic communication skills and successfully reading social situations.

Social Narratives - typically a short story that describes the relevant social cues and examples for appropriate social responses. Narratives are written for a variety of social situations and often include visual aids.

Social Skills Training - interventions focusing on building interaction skills in children with ASD by targeting basic responses to complex social skills.

Social Stories™ – personalized, short stories developed and written by teachers, therapists or family members. Social stories utilize the strength as a visual learner that many persons with autism exhibit. They can be used for any situation or concern such as haircuts, sharing, going to the library or making the bed, and gives a handle to the person with autism with which to approach the complex area of social skills.

Special Education – a set of educational programs or services designed to meet the needs of individuals whose special needs cannot be met in the regular classroom.

Speech/Language Therapy – a planned program to improve and correct speech, language, or communication problems.

Story-based Intervention Package - involves a written description of the situations that typically elicit problem behavior.

Structured Teaching - based on the neuropsychological characteristics of individuals with autism, this intervention involves a combination of procedures that rely heavily on the physical organization of a setting, predictable schedules, and individualized use of teaching methods.

Structured play groups – a play group with a clearly defined area, theme, goals and inclusion of peers. The adult leads the group using prompting, scaffolding, and guidance to help participants meet their goals.

Task analysis – a process by which a complex skill is broken down into smaller steps and is systematically prompted and reinforced by an instructor.

Technology-aided instruction and intervention (TAII) - interventions that require the presentation of instructional materials using computers or related technology (NPDC, 2014)

Theory of Mind Training - designed to teach individuals with ASD to recognize and identify mental states in oneself or in others and use that information to predict their actions.

Time delay - a method of prompting in which a specified amount of time elapses between an initial instruction for a response and any additional prompting or instructions

Video modeling - a method of instruction in which the learner watches a video of themselves or another person performing a target skill.

Visual supports - a method of prompting in which a visual aid (e.g., pictures, printed words, 3-D objects, maps, labels, and arrangement of objects or boundaries in the environment) are used to help

...putting the “pieces” together for young children with autism

The AAP is the Autism Waiver program for the state of Arkansas. It provides intensive home-based intervention for eligible children diagnosed with ASD who are between the ages of 18 months and 7 years. (Children must enter the program before their 5th birthday). Children receive between 20 and 30 hours per week of one-to-one treatment utilizing evidence-based interventions. There is no cost to the family if the child meets Medicaid eligibility requirements. Since eligibility can be determined based on the CHILD’S income, most children meet financial requirements. Parents are considered an important part of the treatment team and must agree to be present and participate in order to be eligible.

For questions or to receive an application, email Karan Burnette at kbburnet@uark.edu

CAMP CONNECT is expanding!

We will now be offering 3 summer camp sessions.

The dates for Camp Connect 2016 are:

Preschoolers - June 13-16

Advanced Learners - June 20-23

Intermediate Learners - June 27-30

Camps will be held in the ARKA building on the U of A campus.
